

EARLY DEVELOPMENT INDEX (EDI) DISTRICT PROFILE REPORT

2016

Westminster School District

**Prepared by: Children and Families Commission of Orange County and
UCLA Center for Healthier Children, Families and Communities**

Below is a brief overview of the Early Development Index (EDI), what it measures and how the results can be used. This overview also provides you with an explanation of how to interpret the report.

What is the EDI? It is a checklist filled out on all children in kindergarten that was developed by the Offord Centre for Child Studies at McMaster University in Canada. The Children & Families Commission of Orange County, which invests in programs and organizations to ensure that all children in Orange County are healthy and ready to learn when they enter school, is leading this effort in partnership with the UCLA Center for Healthier Children, Families and Communities.

What does the EDI measure? The EDI includes five key domain areas (described in Figure 1) and is used to produce holistic, community-level measures of childhood development during the kindergarten year. The EDI identifies the percentage of children who are vulnerable and on track by developmental domain and compares this information by target community. The EDI is *not* designed to screen, identify or diagnose individual children. The EDI can be used to monitor populations of children over time, report on populations of children in different communities, predict how groups of children will do in elementary school, and inform policies concerning young children and their families.

Figure 1. Description of EDI Developmental Domains

Domain	Description
Physical Health & Well-being	Absence of disease or impairment, access to adequate and appropriate nutrition, and gross and fine motor skills. Necessary gross and fine motor abilities to complete common kindergarten and first grade tasks, including items such as controlling a pencil or turning pages without tearing the pages.
Social Competence	Children need to meet general standards of acceptable behavior in public places, control their behavior, cooperate with others, show respect for adult authority, and communicate feelings and needs in a socially acceptable manner.
Emotional Maturity	Emotional maturity is characterized by a balance between a child’s curiosity about the world, an eagerness to try new experiences, and some ability to reflect before acting. A child who is fearful and reluctant to engage in new activities misses learning opportunities that are seized upon by a child with a positive approach to life.
Language & Cognitive Development	Language skills refer to vocabulary size and a child’s ability to name letters and attend to the component sounds within words. Cognitive skills involve the ways in which children perceive, organize, and analyze information.
Communication Skills & General Knowledge	Children must be able to understand verbal communications with other adults and children and to verbally communicate experiences, ideas, wishes, and feelings in a way that can be understood by others.

How are EDI data interpreted? This report depicts the percent of children “not on track” and “on track” in your district by the five developmental domains. Children are “not on track” in a domain if their mean EDI score for that domain falls at or below the 25th percentile normative cutoff. Conversely, children are “on track” in a domain if their mean EDI score for that domain falls above the 25th percentile.

How are the EDI results used in communities? You have received a district profile report that shows the EDI results for the children in your district. The community will receive a community profile report, which combines data from multiple schools to show how EDI results vary neighborhood by neighborhood. For the community profile report, results are geographically mapped to other socio-demographic and community indicators. This allows communities to reflect on where and why children are doing better and or worse in particular geographic and developmental areas. EDI maps help to “put children on the map” and are useful tools to engage communities in a data-driven process to inform and improve early childhood service systems.

**Early Development Index (EDI)
Westminster School District Report
2016**

Number of participating schools: 13

The tables below present EDI data collected between 2014 and 2016 for your participating schools from your district as well as all districts in Orange County. The columns labeled “All Participating Schools in District” include all the schools that participated this year and in the prior two school years, as applicable. Table 1 presents data on the number of EDI records collected, as well as the demographic characteristics of the children with EDI records. Table 2 indicates the number and percent of kindergarteners who are categorized as developmentally not on track (this includes *vulnerable* (lowest 10th percentile) and *at risk* (10th-25th percentile)) as well as children who are developmentally on track (25th – 10th percentile).

Table 1. Descriptive Characteristics:

	All Participating Schools in District		All Participating Districts in Orange County	
Number of EDI Records Collected	1,074		32,074	
Number and Percent of EDI Records Valid for Analysis	1,056	98%	31,496	98%
Number and Percent of Participating Schools in District	13	100%	379	100%
Student Demographics	N	%	N	%
<i>Race/ethnicity*</i>				
African-American, Black	12	1%	502	2%
Asian, Native Hawaiian, or other Pacific Islander	388	37%	5,644	18%
Hispanic, Latino/a	422	40%	14,764	47%
White	173	16%	8,463	27%
Other/Multiracial	61	6%	2,064	6%
<i>Mean Age (years, months)</i>	5 years, 10 months		5 years, 10 months	
<i>Females</i>	521	49%	15,269	48%
<i>Students with ELL Status</i>	613	58%	13,832	44%
<i>Students with an IEP</i>	42	4%	2,002	6%
<i>Needs Further Assessment</i>	57	5%	1,916	6%
<i>Waitlisted for Further Assessment</i>	24	2%	762	2%
<i>K Students with TK Experience**</i>	181	17%	3,613	11%
<i>Parents/Guardians Volunteered in Classroom</i>	287	27%	13,011	41%

Data Sources: 1) School district data for race/ethnicity and age; 2) Teacher Reported EDI Checklist for gender, ELL status, IEP status, assessment questions, and special problems.

* Due to missing data, the percents may not add up to 100%.

**As of 2015/16 school year, only kindergarten students—rather than kindergarten and transitional kindergarten students—are participating in the EDI data collection.

All Participating Districts in Orange County	15,426	49%	5,783	18%	3,816	12%	2,637	8%	2,139	7%	1,695	5%

Data Source: Teacher Reported EDI Checklist

* Due to missing data, the N may differ by developmental domain

Tables 3 through 7 present EDI data, by sub-domain. For the sub-domain analysis, children are categorized as either "not ready," "somewhat ready," or "ready" for school based on how they compare to a criterion-referenced cutoff value that has been determined by the publishers at the Offord Centre. This method contrasts with that used for the overarching domain level analysis (Table 2), which categorizes children as "on track" and "not on track" based on how they compare to a cut off value that has been derived from a U.S. normative sample taken in 2009-2010.

Table 3. EDI Sub-domain - Physical Health and Well-being

Sub-domain	All Participating Schools in District				All Participating Districts in Orange County			
	N	Not Ready	Somewhat Ready	Ready	N	Not Ready	Somewhat Ready	Ready
Physical readiness for school day*	1,055	1%	N/A	99%	31,490	2%	N/A	98%
Physical independence*	1,056	10%	N/A	90%	31,493	11%	N/A	89%
Gross and fine motor skills	1,055	33%	18%	49%	31,488	36%	16%	48%

Data Source: Teacher Reported EDI. Totals of 99 percent and 101 percent are due to rounding.

* The "somewhat ready" category does not apply because the response options on the EDI for these sub-domains were dichotomous (yes/no).

Table 4. EDI Sub-domain - Social Competence

Sub-domain	All Participating Schools in District				All Participating Districts in Orange County			
	N	Not Ready	Somewhat Ready	Ready	N	Not Ready	Somewhat Ready	Ready
Overall social competence	1,056	11%	43%	46%	31,487	10%	44%	45%
Responsibility and respect	1,056	9%	21%	69%	31,494	7%	18%	74%

Appendix B: EDI Subdomain Details

Domain	Subdomain	EDI Questions Contributing to Subdomain	What “Not Ready for School” looks like	What “Ready for School” looks like
Physical Health and Well-being	Physical readiness for school day	<ul style="list-style-type: none"> • Over- or underdressed for school-related activities • Too tired/sick to do school work • Late • Hungry 	Children have at least sometimes experienced coming unprepared for the school day by being dressed inappropriately, coming to school late, hungry, or tired.	Children who never or almost never experienced being dressed inappropriately for school activities, coming to school late, hungry, or tired.
	Physical independence	<ul style="list-style-type: none"> • Independent in bathroom habits most of the time • Shows an established hand preference • Well-coordinated • Sucks a thumb/finger 	Children range from those who have not developed one of the three skills (independence, handedness, coordination) and/or suck a thumb to those who have not developed any of the skills and suck a thumb.	Children who are independent looking after their needs, have an established hand preference, are well coordinated, and do not suck a thumb/finger.
	Gross and fine motor skills	<ul style="list-style-type: none"> • Proficient at holding a pen, crayons, or a paintbrush • Ability to manipulate objects • Ability to climb stairs • Level of energy throughout the school day • Overall physical development 	Children range from those who have an average ability to perform skills requiring gross and fine motor competence and good or average overall energy levels, to those who have poor fine and gross motor skills, overall energy levels, and physical skills.	Children who have an excellent ability to physically tackle the school day and have excellent or good gross and fine motor skills.
Social Competence	Overall social competence	<ul style="list-style-type: none"> • Overall social/emotional development • Ability to get along with peers • Plays and works cooperatively with other children • Able to play with other children • Shows self-confidence 	Children who have average to poor overall social skills, low self-confidence and are rarely able to play with various children and interact cooperatively.	Children with excellent/good overall social development, very good ability to get along with other children and play with various children, usually cooperative and self-confident.
	Responsibility and respect	<ul style="list-style-type: none"> • Follows rules and instructions • Respects the property of others • Demonstrates self-control • Demonstrates respect for adults 	Children who only sometimes or never accept responsibility for actions, show respect for others and for property, demonstrate self-control, and are	Children who always or most of the time show respect for others and for property, follow rules and take care of materials, accept responsibility for
